Only Some Insulating Handles Even Have a Memory Stop. None Adjusts This Easily.

Trim service times with INSULATOR/MS[®]. Unlike other insulating ball valve handles with memory stop, INSULATOR is the only one you can adjust without taking the handle apart. Simply pop off the top cover to make memory stop adjustments with a hex wrench.

INSULATOR also prevents condensation and moisture damage, configures to fit more than 480 valve styles and sizes, and features the timesaving design that sets it apart—and you ahead.

For specs and more, visit [MilwaukeeValve.com](https://www.MilwaukeeValve.com) or [HammondValve.com](https://www.HammondValve.com).
