

Look Closer.

Some valve manufacturers skimp on materials to reduce weight... and cost. Those valves may look similar to Milwaukee Valve's and even pass specs, but they can fail at a higher rate and require more service call-backs.

At Milwaukee Valve, we design valve weights with a reason — strong, reliable performance. No skimping, no cutting corners. Just reliable valves backed by responsive innovation and knowledgeable product support. Look for big differences in weights and size. And then factor the inevitable cost of the follow-up call-back into your final price if you don't use Milwaukee Valve.

For more information, check out our extensive lines of iron, cast steel, brass, bronze, and UltraPure lead-free gate, globe and check valves at www.MilwaukeeValve.com. Whether specifying or installing multi-turn valves, you can rely on our more than 120 years of valve manufacturing experience.
