

# The More You Know

January 21, 2026

## 125 Years Ago...

This year, **2026**, Milwaukee Valve is celebrating the 125<sup>th</sup> anniversary of the company's founding. You know Milwaukee Valve, because you buy and install our products. But what stands behind the brand? What distinguishes Milwaukee Valve from our competition? In the coming weeks and months, we will share and reflect on the milestones that made us what we are today, as well as look to the future as we continue to improve our products and processes to pursue new opportunities and markets.

Since 1901, Milwaukee Valve has built valves designed to meet the exacting standards of the commercial and industrial markets. Our engineering experience and expertise in these demanding applications serves to support the needs of specifying engineers and installing contractors in the United States and throughout the world.

Milwaukee Valve manufactures valves in facilities located worldwide, as well as through longstanding vendor partnerships. In each of these facilities and arrangements, we retain **complete control of design, quality, and manufacturing standards**. Our customers have peace of mind knowing that each and every valve they receive is of the highest quality.

All of our factory operations are certified to the **International Standards Organization (ISO) 9001**

standard for design and manufacturing control and the **ISO 14001** standard for safety and environmental compliance. Each facility is also equipped with skilled engineers who are on-site and able to support the design and the translation of that design into the finished manufactured product. This hard work and dedication has earned an excellent reputation with the U.S. Navy, who is known for its demanding quality-control standards. We apply these same standards to all of our manufacturing efforts, both domestically and internationally.

Every single product made by Milwaukee Valve is built to one standard. Our patterns are heavier and more robust, because the cost of failure is too high to our reputation and our on-going business relationships. With over 10,000 products made from brass, bronze, our lead-free UltraPure alloy, iron and steel, customers can count on Milwaukee Valve to deliver **Innovation**, **Experience**, **Quality** and **Dependability In Every Valve**.
