The **NEW** Insulating Valve Handle That Does Even More? No Sweat!

Work Smarter, Not Harder.

At the 2026 AHR Show in Las Vegas, Milwaukee Valve launched the new **TIHL** handle, which will eventually replace the hugely popular INSULATOR/MS[®] handle.

TIHL

All the positive attributes of the INSULATOR/TIH handles are still found in the new **TIHL** handle. **TIHL** controls condensation and saves time since there is no need to disassemble for adjustments. The big improvement is the ease of setting the upgraded memory stop without ANY tools (Tools are still required to add the **TIHL** to a valve), and the Lockout/Tagout feature that INSULATOR/TIH did not have.

As with the INSULATOR/TIH, **TIHL** creates a heat-transfer barrier between piping systems and the exposed portion of a valve handle and surrounding air. This barrier reduces or eliminates condensation, and keeps damaging moisture from

infiltrating insulated systems. Its operating range of 15° F to 250° F lets you specify multiple project types with one versatile product.

TIHL is also certified to UL standards. Available for all ¼" thru 2" Milwaukee Valve brass and bronze commercial ball valves, **TIHL** unique memory stop

adjusts easily with a few quick turns of thumb screws, while competitive handles require time-consuming disassembly to perform stop adjustments. And the new handle includes a lock-out feature that was not available with the INSULATOR. (Safety lock NOT included.)

For more information on Milwaukee Valve's **TIHL** handle, click **HERE** for a cut sheet or contact your Milwaukee Valve customer service rep today. A complete listing, by territory, can be searched at our website, at www.MilwaukeeValve.com/Find-Sales-Rep/.
