

## When it comes to commercial ball valves, Milwaukee Valve has you covered.

Milwaukee Valve offers a full line of ball valves in a variety of body materials including UltraPure® lead-free bronze and brass, our standard Navy bronze, brass, stainless steel and carbon steel. These valves are available in sizes ¼" to 12".

All UltraPure lead-free bronze and brass ball valves have RPTFE seats & seals, adjustable stem packing, and blowout proof stems. Two-piece & three-piece valve styles have a wide variety of trim & operator options including locking handles, oval handles, "T" handles, actuators, stem extensions, and the Insulator® MS Handle.

The carbon-steel and stainless-steel valves are available in one-piece, two-piece, three-piece, unibody, and split-body flanged. End connections include FNPT, socket weld, butt weld, and ANSI 150 & 300 flanged. A variety of locking, oval, and extended handles are available, as well as electric & pneumatic operators. Special preparations such as fire-safe, chlorine prep, and cleaned for oxygen service are also available.

Valves for medical gases feature domestic bronze bodies and extended copper tube ends in male or female configurations. As a standard option, these valves are cleaned for oxygen service. Other options include SS trim, single or dual-gauge ports, and
