Milwaukee Valve Celebrates 125 Years of American Manufacturing Excellence and Innovation

Milwaukee Valve, an industry leader in valve manufacturing and flow-control solutions, proudly announces its 125th anniversary. This significant milestone marks more than a century of American ingenuity, craftsmanship,

and reliable quality. Since its founding in 1901, the company has grown from a local Milwaukee manufacturer into a global provider of high-performance valves serving commercial, industrial, marine, and military markets.

From its modern manufacturing facilities and corporate operations in Wisconsin, Milwaukee Valve continues its 125-year history of precision engineering, customer-focused innovation, and uncompromising product integrity.

“It’s a great honor to celebrate 125 years of Milwaukee Valve,” said John Labellarte, Milwaukee Valve’s President and COO. “This milestone anniversary not only reflects our company’s longevity, but also the character and integrity of the people who built it—generations of our associates, supply chain partners, and customers who have believed in our products, mission and vision. We are extremely proud of our deep heritage and excited about our future.”

Throughout its history, Milwaukee Valve played an important role in American industry. Its valves have advanced energy production, supported critical infrastructure, and contributed to U.S. military readiness—including supplying specialized valves for Navy shipbuilding programs.

Milwaukee Valve’s 125th anniversary celebration will highlight key historic events, including innovations in bronze, iron, and specialty alloy valve technologies; expansions into new markets; and the company’s longstanding legacy of customer trust. Celebratory events and commemorative initiatives will be hosted throughout 2026, engaging employees, partners, and community members.

“We manufacture the highest quality valve products that are used in critical and mission critical flow control systems that our customers can trust for reliability and performance.” added Labellarte. “As we look ahead, our future success will come from the continual investment in our associates, supply chain relationships, innovative product solutions, utilization of new technologies, and world class manufacturing operations. We remain committed to delivering maximum value to our stakeholders and are thrilled to embark on this next era of growth.”

About Milwaukee Valve

Founded in 1901 and headquartered in the U.S., Milwaukee Valve Co., LLC, a subsidiary of NIBCO INC., manufactures a broad range of high-quality valves for commercial, industrial, commercial marine, and naval marine military applications. Its commitment to precision engineering, domestic

manufacturing, and long-standing customer partnerships make Milwaukee Valve one of the most trusted companies in flow-control solutions.
