

Grooved-End Butterfly Valves From Milwaukee Valve

Go with the grooved-end butterfly valve line that's reliable and here to stay—just like Milwaukee Valve. Grooved valve ends make installation faster, omit hot work permits and supplies, allow wet and dry access, and accommodate system expansion/contraction.

For installation into grooved piping systems, our grooved-end butterfly valves are also a fab addition to our high-performance and standard butterfly valve families.

For the past 120 years, we've built valves to last. If you dig that, head over to [MilwaukeeValve.com](https://www.milwaukeevalve.com), or contact your [Milwaukee Valve sales](#) rep today.
