

The Biggest In Lead-Free Gets Better

Milwaukee Valve has extended the broadest line of lead-free* products by attaining IAPMO R&T approval for the complete line of resilient-seated and high-performance butterfly valves, adding the butterfly valves to the UltraPure® product line. By selecting a Milwaukee Valve butterfly valve for your application, you no longer have to factor valve material into your selection criteria.

When you need lead-free valves for potable systems, stay ahead of the competition by specifying and installing UltraPure valves. In addition to the new butterfly valves, UltraPure valves are IAPMO R&T approved to NSF/ANSI 372 for lead-free compliance and NSF/ANSI 61 Drinking Water System Components.

The largest selection of lead-free valves on the market includes extensive coverage of UltraPress® press-fit valves. The UltraPure family also includes:

- 2-Piece Brass & Bronze Ball Valves
- 3-Piece Bronze Ball Valves
- Brass, Bronze & Iron Gate Valves
- Brass & Bronze Globe Valves
- Brass, Bronze & Iron** Check Valves
- Bronze & Iron** Spring Check Valves
- Slo-Close Butterball** Valves

Visit our website at www.MilwaukeeValve.com to learn more about potable systems standards and see our video on soldering tips for our lead-free alloys. While there, you'll also find UltraPure specs and features, downloadable product literature, and Milwaukee Valve representative contact information to help you determine when and where to use no-lead valves.

*Lead content less than 0.25%.

**Approved to NSF/ANSI 372 only.
