

Serving The Silent Service

On National Submarine Day (April 11), we celebrate the first modern commissioned submarine. This date commemorates the accomplishments and contributions of U.S. Navy submarines, as well as the men and women who serve aboard them. And for more than 50 years, Milwaukee Valve Company has been manufacturing valves for use on a wide variety of United States Navy warships, including all seventy of the attack and ballistic submarines currently commissioned, and the eleven boats in various stages of construction or testing, as well as eleven additional boats on order.

Milwaukee Valve is an important supplier of valves to the U.S. Navy. These valves, by the thousands, are on every U.S. aircraft carrier, battleship, submarine, frigate and support ship in service today. Milwaukee Valve operates a state-of-the-art bronze foundry and manufacturing operation in Prairie du Sac, WI. The foundry features the most advanced technology available, which is required to pour five different bronze alloys and Monel. The metallurgical skills necessary for these various materials are unique to Milwaukee Valve, affording U.S. Navy and commercial and industrial customers with expertise and experience not readily available elsewhere. Working for the Navy allows us to stretch our engineering muscles and solve demanding flow-control issues. This technology can carry over into commercial/industrial applications.

Please join us in celebrating the value, accomplishments, and contributions of U.S. Navy Submarines. For more

information on the products available from Milwaukee Valve's Marine Division, visit www.milwaukeevalve.com/product-category/marine-valves/

Remember to register for [Tuesday's](#) Ball Valve Bootcamp. Commercial product manager Bob Rudman will tell the ball valve story, including common features, designs, application suggestions and restrictions, standards, pressure-temperature limits, and accessories.

The webinar is FREE and will start at 1:00 (CDT) and run for 30-45 minutes, including a short Q&A session following the program.
