

WEBSITE UPDATE AND WEBINAR RECAP

Milwaukee Valve has added more than 670 products to its website's extensive competitive cross-reference tool. The new products are the company's high-performance butterfly products... 348 stainless steel HP valves and 288 carbon steel HP valves.

The screenshot shows the Milwaukee Valve website's navigation bar with the company logo and a search bar. Below the navigation bar, the breadcrumb trail reads "Home » Competitor Cross Reference". The main heading is "Competitor Cross Reference". Below the heading is a form with a dropdown menu. The form contains the text "Please select a competitor for whose part you'd like to find a replacement." and a dropdown menu with the text "-Select-".

These additions provide valve specifiers with information to simplify the specification of a large package of products, aiding proper product selection for more conditions and applications. For more information, click [CROSS REFERENCE](#).

On Tuesday, commercial products manager Bob Rudman conducted a Ball Valve Bootcamp. Rudman provided an overview of what ball valves are, common features and designs, including materials and styles, pressure-temperature limits, industry standards, application suggestions and restrictions, and ball valve accessories.

BALL VALVE BOOTCAMP

The 30-minute webinar provided an excellent overview for people new to the industry or who only have a basic understanding of the role of the ball valve in mechanical systems.

If you missed the webinar, you can view it [HERE](#), or pass it along to others within your organization. (Registration required.)
