How A Valve Makes It Into Your Building.

On Wednesday afternoon, Milwaukee Valve's national sales manager Chris Tarantello took us on a quick trip to show how Milwaukee Valve products move through the typical distribution chain.

Tarantello used a hospital as a generalized example to show the influences of the various stakeholders, from the building's owner, through the architect, through the general

contractor, down to the specifying mechanical engineer through distribution and to our sales representative network.

A recording of the webinar is available on-demand by clicking the button above. Registration is required for Live or On-Demand attendance.
