

Grooved-End And Standard Valves Work Together In Harmony.

Perfect fits begin with single-manufacturer sourcing.

To reduce costs in grooved piping systems, standard valves can replace the most expensive grooved-end valves. But, to get perfect fits in these hybrid systems it's best to source from one manufacturer.

Milwaukee Valve's got your back. Our grooved-end butterfly valves install easily into grooved systems, but they also work in harmony with our standard lug butterfly, large OD iron gate and globe valves, and others in our standard and high-performance product lines.

Get system-wide sourcing at MilwaukeeValve.com, or contact your [Milwaukee Valve sales rep](#) today.

BUTTERFLY VALVE BOOTCAMP

Remember to register for the Butterfly Valve Bootcamp. Regional manager Jeff Kiefer will provide an overview of the Butterfly Valve. Join us on **Tuesday, May 25th**. The webinar will start at 1:00 (CDT) and run for 45-50 minutes, followed by a short Q&A session. Continuing Education Units (CEUs) are available from the American Society of Plumbing Engineers (ASPE). A link to the registration page can be found at the [Milwaukee Valve](#) website today or by clicking [HERE](#). Registration is required for Live or On-Demand attendance.
