

Valve Installation Bootcamp – Do's & Don'ts.

Yesterday, applications engineering manager Lisa Hall conducted a short, excellent webinar on many of the field issues that can affect valve installations. From system design, to media, to service conditions, to maintenance issues, to system expansion, so many factors can affect the difference between a trouble-free installation and those with too many call-backs to count.

If you missed the webinar, you can view it [HERE](#) or pass it along to others in your organization.

Our next Webinar will be on Tuesday, July 13. The material will focus on **High Performance Butterfly Valves**. Look for more information.
