

The More You Know

July 8, 2026

More Than Meets The Eye...

For 125 years, Milwaukee Valve has built a reputation for quality, reliability, and American manufacturing excellence. Central to that legacy is the company's bronze valve manufacturing capability, supported by its foundry operations in Prairie du Sac, Wisconsin. This facility plays a critical role in producing high-quality bronze castings, providing Milwaukee Valve with greater control over materials, processes, and product consistency from the earliest stages of production.

By maintaining foundry operations in the United States, Milwaukee Valve ensures that every bronze valve is manufactured to exacting standards. From casting and machining to assembly and testing, each step is guided by rigorous quality control procedures designed to deliver dependable performance and long service life. The integration of foundry and manufacturing operations

enables consistent product quality, reliable supply, and continuous process improvement.

Today, Milwaukee Valve’s 125-year legacy reflects a commitment to American craftsmanship, engineering expertise, and manufacturing excellence. Customers can trust that every bronze valve produced is backed by generations of experience and a dedication to delivering consistent, high-quality products from its Wisconsin-based operations.
