

## Can't Stop, Won't Stop Learning...

No matter where you are in the Milwaukee Valve supply chain... existing customer, potential customer, specifying engineer, installing contractor, distributor, maintenance or a sales representative, you can never stop learning.

That's why Milwaukee Valve has invested so much time and energy into the Bootcamp Webinar program. Seven to eight times each year, Milwaukee Valve conducts fact-filled presentations on various aspects of commercial and industrial plumbing systems, obviously emphasizing the roles that valves play in those systems.

All of the webinars can be found under the [Resources](#) tab on the Milwaukee Valve website. For most of our technical presentations, Milwaukee Valve has teamed with the American Society of Plumbing Engineers (ASPE) for Continuing Education Unit credits (CEUs). For the presentations that qualify for CEUs, one hour credits are provided following the attendance of the appropriate webinar. After viewing the webinar, simply click on the CEU button on the Webinar page and fill out and submit the webform, and a certificate will be emailed to you.

The webinars run for 45-50 minutes, followed by short Q&A sessions. Registration is required for On-Demand attendance. Anyone can register for Live or On-Demand versions. For questions or suggested webinar topics, please email our webinar producer, Jim Vogel at [webinars@milwaukeevalve.com](mailto:webinars@milwaukeevalve.com).
