

BUTTERFLY BOOTCAMP III

Join us for the final installation of Butterfly Valve Bootcamp. Proper installation is key to a trouble-free start-up and a longer valve lifespan. With schedule-driven projects, no one has time for installation mishaps or setbacks. In Part III, regional manager Jeff Kiefer will cover installation details for resilient-seated and double offset high-performance butterfly valves. Learn more about installation guidelines, dead-end service and routine troubleshooting of minor issues during the install.

Link up with us on [Tuesday, August 24](#). The webinar will begin at 1:00 (CDT) and run for 45-50 minutes, followed by a short Q&A session. Continuing Education Units (CEUs) are available from the American Society of Plumbing Engineers (**ASPE**). A link to the registration page can be found at the [Milwaukee Valve](#) website today or by clicking [HERE](#). Registration is required for Live or On-Demand attendance.
