

## Understanding Approvals

Product certifications can be a confusing element of the specification and product purchase cycle. So Milwaukee Valve's application engineering manager Lisa Hall conducted a 50-minute presentation explaining the importance and rationale of the Approval system. The content was an excellent primer for sales representatives, distribution partners, installing contractors and the specifying engineers responsible for designing the systems and specifying the components related to these approvals.

The webinar qualifies for Continuing Education Units (CEUs) from the American Society of Plumbing Engineers (**ASPE**), and the webinar is available on-demand.

A link to the registration page can be found at the [Milwaukee Valve](#) Resources tab or by clicking the button to the right. Registration is required for On-Demand attendance.
