

## Milwaukee Valve Actuation... The Whole Package

On Tuesday, applications engineering manager Lisa Hall wrapped up her 2-part webinar on the valve actuation available from Milwaukee Valve. In **PART 1**, she covered what actuation is, why valves are actuated, and provided a quick understanding how these actuator designs work. **PART 2** summarized the various details needed to quote an actuation package... What is needed, and Why it's needed. She provided a quick overview of how to mount actuators, a description of actuator accessories and a review of some actuation projects.

Both episodes are available by clicking here (**PART 1**) and here (**PART 2**). For more information on actuation and the packages available from Milwaukee Valve, contact your sales representative, your regional manager or one of our application engineers today.
