MILWAUKEE VALVE
OPTIONS & ACCESSORIES

MEMORY STOP
The “MS” Memory Stop provides an adjustable stop when the valve is used in a balancing application. The Memory Stop can be set to any preset opening point.

CHAINWHEEL
The chain wheel provides for remote operation of the valve in high, normally out-of-reach locations. Attaches to the gear operator easily for quick valve open/close response. Sprocket rim is aluminum; chain is steel. Specify the handwheel diameter (“A” dimension) and chain length. Chain sold separately.

STEM EXTENSION
Provides means of operation at a required distance away from the valve body. Manual or automatic, actuators are easily adapted to mounting flange on the extension. To order, specify distance from valve mounting-flange to base of operator.
