MG Series

3-PIECE BRONZE BALL VALVE
WITH EXTENDED COPPER-TUBE ENDS

- Ideal for use in medical gas systems, pharmaceutical applications and other applications where valve disassembly prior to installation is undesirable.
- Extended-tube ends can be soldered or brazed into service without disassembly, reducing installation time.
- Full-port (1/2"-2 1/2") design provides high flow with minimal pressure drop.
- 3-piece construction simplifies maintenance and repair.
- Additional standard features include reinforced RPTFE seats and adjustable PTFE packing, a blow-out proof stem and a chrome-plated brass ball or stainless steel ball.
- Customized to meet individual requirements.
- Sizes range from 1/2”– 3”.

How to Order Milwaukee Valve Medical Gas Ball Valve

Notes:
Male ends are copper tube type K.
Female ends are copper tube type L or type K.
Valve handle 4.8 inches max. from centerline of valve.
Gauge Port 1/8" NPT Standard and is located on right side tube. When 2 ports are specified they are both equal distance from valve centerline.
Tube Length is defined as distance from the end of the valve tailpiece to the tube end.
Right side tube is defined as tube on the side under the handle when the valve is in the open position.
When chrome plating is specified the last 4" of the tube extensions will NOT be plated. This is an external plating only.

Part Number Ex.:
MG-DM244800BOS = 1/2" Tube Connections; Male, Left Side Extension 6 Inches; Right Side Extension 11 1/4 Inches; Gauge Port Dimensions 4-1/4 Inches From Valve Centerline; Brass Stem / Brass Chrome Pld. Ball; Oxygen Cleaned / Chrome Plated; Top Gauge Port
MG-DM323216BOLDS = 1/2" Tube Connections; Male, Left Side Extension 8 Inches; Right Side Extension 8 Inches; Gauge Port Dimensions 4 Inches From Valve Centerline; Brass Stem / Brass Chrome Pld. Ball; Oxygen Cleaned / Stainless Steel Locking Lever; Side Gauge Port

***Other tube lengths may be available consult factory before ordering***
Specifications:
Approved valves shall be Milwaukee Valve MG Series. Valves shall meet or exceed the requirements of MSS-110. Valves shall be 3-piece, bronze body, full-port design (1/2”-2 1/2”) and include flexible RPTFE seats and PTFE packing. Valves shall have a blow-out-proof stem. Valves shall be provided from the factory with Type “K” male or female or Type “L” female end copper-tube extensions. When required, the valves shall be factory-cleaned for oxygen service in conformance with MVES-60-02, NFPA 99C, CSA-41. Each cleaned valve shall include protective caps on the copper-tube ends, and be sealed in protective bags to prevent contamination prior to installation.

Options Available:
• Male Tube Ends – Type “K” (Standard)
• Female Tube Ends – Type “K” or “L” (-F)
• Cleaned For Oxygen Service (-OC)
• Stainless-Steel Ball And Stem (-S)
• Stainless-Steel Locking Lever (-LD)
• Oval Handle (-OH)
• Oval Locking Handle (-LO)
• Stem Extension (-XH)
• Stainless-Steel Lever Handle (-SH)
• Guage Ports (-G)

Pressure temperature charts containing valve seat and body ratings are available from the factory. Please contact the factory for accurate application data.

*Not intended for use in potable water.
